

DON'T LET RENT BECOME A FOUR-LETTER WORD

For most organisations, renting certain assets makes sense.
The opportunity to shift CAPEX into OPEX is always attractive.
And if you're dealing with technology - where innovation far outpaces depreciation -
it helps keep the business ahead of the curve while containing cost of ownership.

NetTrace Lease Management reduces rental risks - and the administration associated with contract management
to create an automated process that keeps assets accounted for and penalties to an absolute minimum.

Automated Contract Management

Every asset is linked to its rental agreement via its unique identifier.

Limit Risks Associated with Late Returns

Never miss a return date with active reminders at 90, 60 and 30 days before end of contract.

100% Accurate and Verified, from Day One

Capture data more accurately during on-boarding by loading data directly into your ERP. Then verify on the spot with [NAMScan](#).

Contain Complexity

Manage multiple vendors, multiple contracts, and thousands of devices effortlessly

Track and Manage Assets in Real Time

When the time comes to return them, you'll know exactly where they are and their condition.

NetTrace Lease Management. Just another way we're [bringing simple back](#).
